### Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

| S.No | Feature Name                    | Description                                                                                         | Status (Implemented / Partial / Pending) | Demonstrated (Yes / No) | Remarks                                            |
|------|---------------------------------|-----------------------------------------------------------------------------------------------------|------------------------------------------|-------------------------|----------------------------------------------------|
| 1    | User Data Input                 | Allows users to enter applicant details such as age, income, employment status, and credit history. | Implemented                              | Yes                     | Successfully accepts user input.                   |
| 2    | Data Preprocessing              | Cleans missing values, encodes categorical data, and scales features before prediction.             | Implemented                              | Yes                     | Improved model accuracy.                           |
| 3    | Credit Card Approval Prediction | Uses a Machine Learning model to predict whether the application will be approved or rejected.      | Implemented                              | Yes                     | Produces accurate predictions based on input data. |
| 4    | Model Performance Evaluation    | Evaluates the model using accuracy, precision, recall, and confusion matrix.                        | Implemented                              | Yes                     | Performance metrics displayed successfully.        |
| 5    | User-Friendly Interface         | Provides a simple interface for entering applicant information and viewing results.                 | Implemented                              | Yes                     | Easy to use and responsive.                        |
| 6    | Prediction Result Display       | Displays the final decision (Approved/Rejected) with confidence based on the trained model.         | Implemented                              | Yes                     | Results generated instantly.                       |

### Feature Implementation Summary:

|                                 |      |
|---------------------------------|------|
| <b>Total Features Proposed</b>  | 6    |
| Total Features Implemented      | 6    |
| Total Features Demonstrated     | 6    |
| Overall Implementation Rate (%) | 100% |
