

Project Demo Planning

Date	30 June 2026
Team ID	XXXXXX
Project Name	XXXXXX
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project objective, motivation, and the importance of predicting credit card approvals.	2	Team Leader
2	Problem Statement & Dataset	Explain the challenges in manual approval, dataset used, and the features considered for prediction.	3	Member 1
3	Solution & Model Explanation	Describe data preprocessing, machine learning algorithm, model training, and evaluation process.	4	Member 2
4	Live Demonstration	Demonstrate the application by entering applicant details and displaying the prediction result (Approved/Rejected).	5	Member 3
5	Results & Performance	Present accuracy, confusion matrix, precision, recall, and discuss the model's performance.	3	Team leader
6	Conclusion & Future Scope	Summarize the project, explain its benefits, future enhancements, and answer faculty questions.	3	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain why an automated credit card approval system is needed and the objectives of the project.
2	Solution Overview	Describe the dataset, preprocessing steps, machine learning model, and workflow of the prediction system.
3	Live Feature Demonstration	Enter sample applicant details, run the prediction model, and display whether the application is approved or rejected. Also explain the model's accuracy.
4	Q&A Session	Answer questions related to the dataset, algorithms used, model evaluation, limitations, and future improvements.
