

Scalability & Future Plan

Date	30 June 2026
Team ID	XXXXXX
Project Name	XXXXXX
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited training dataset	May reduce prediction accuracy for diverse applicants	High
2	Supports only basic applicant parameters	Cannot evaluate complex financial profiles	Medium
3	Standalone application without cloud deployment	Limited accessibility and scalability	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a limited number of users	Deploy the application on a cloud platform with load balancing to support multiple users simultaneously.
2	Data Storage	Uses a local dataset	Integrate a cloud database to securely store and manage large volumes of applicant data.
3	Performance	Prediction speed depends on local resources	Optimize the machine learning model and use high-performance cloud servers for faster predictions.
4	Security	Basic authentication and data handling	Implement data encryption, secure authentication, and role-based access control to protect sensitive information.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	Develop a web and mobile application	6 Months	Easy access for customers and banks
Phase 3	Integrate with real-time banking and credit bureau databases	9 Months	Faster and more accurate decision-making
Phase 4	Add Explainable AI (XAI) and fraud detection features	12 Months	Increased transparency, trust, and security in the approval process
