

Solution Requirements

Date	30 June 2026
Team ID	xxxxxxx
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	<i>Users securely log in using username and password.</i>	High
2	Authorization levels	<i>Admin manages applications, applicants can submit and view status.</i>	High
3	External interfaces	<i>System connects with customer database and notification service.</i>	Medium

4	Transactions processing	<i>Processes application details and stores approval decisions.</i>	High
5	Reporting	<i>Generates applicant reports and approval statistics.</i>	Medium
6	Business rules, etc.	<i>Eligibility is determined based on applicant information and predefined rules.</i>	High
7	Compliance to laws or regulations	<i>Protects customer information and follows data privacy regulations.</i>	High
8	<i>Other</i>	<i>Allows applicants to update profile and track application status.</i>	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria

1	Performance & Speed	<i>Fast application processing.</i>	<i>Response time < 2 seconds</i>
2	Scalability	<i>Supports increasing numbers of applicants.</i>	<i>Supports 10,000+ records</i>
3	Security & Data Privacy	<i>Encrypts sensitive customer information.</i>	<i>Secure login and encrypted storage</i>
4	Reliability & Availability	<i>System available at all times.</i>	<i>99.9% uptime</i>
5	Usability & Accessibility	<i>Simple and user-friendly interface.</i>	<i>Easy navigation</i>
6	<i>Other</i>	<i>Easy maintenance and future upgrades.</i>	Modular design
